LAB BOOK PAGE 6 · **Example of tracking (Run 3)**

Example of tracking the ball (Run 3, IMG_3051)

Every sixth frame of the fall (120 fps). The pink circle marks the centre of the ball measured in that frame; the time under each frame is the time since the ball was released.

g = −(slope of the average velocity vs elapsed time trendline). Mean = 8.8938 m/s², sample standard deviation (TI-84 Sx) = 0.1798 m/s², population (TI-84 σx) = 0.1695 m/s², n = 9.

LAB BOOK PAGE 10 · **All 9 runs combined** · *optional extra*

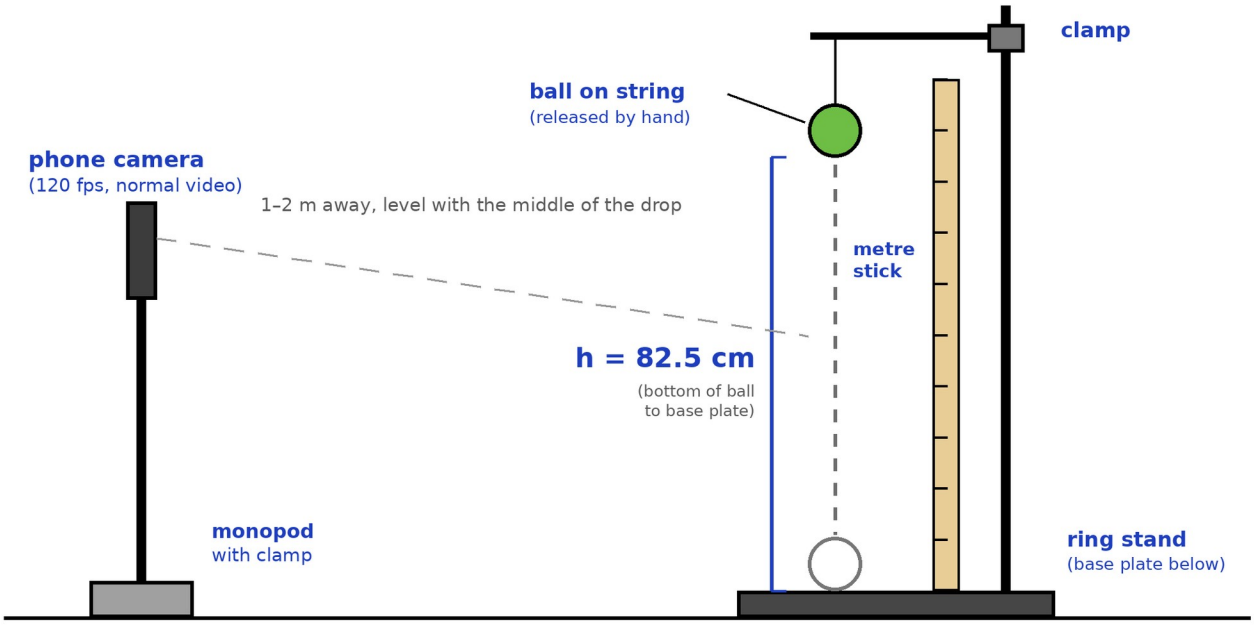

Average Velocity vs Elapsed Time — all 9 runs combined (424 points)

One straight line through every velocity point from all 9 runs: g = 8.882 ± 0.032 m/s² (standard error of the slope).
